PLANS AND DRAWINGS

A LIVE RECORD Kept up to date Add materials when found or sampled, change them when their condition changes, and record removals.	CHECK IT FIRST Before any work on the fabric Including single hole drilling. Pass it to contractors as early as possible, not on arrival.	MATERIAL SCORE From the survey 10 or more high, 7 to 9 medium, 5 to 6 low, 4 or less very low potential to release fibres.	REVIEW At least once a year As part of the review of the management plan, or sooner if the risk changes.
---	---	--	--

P, SP or S: presumed, strongly presumed, or sampled and identified. **Condition:** good, or low, medium or high damage. **Scores:** the surveyor's material score (2 to 12) and your own priority score. Presumed materials are scored as crocidolite. **Labelled:** Y or N.

REF	LOCATION: BUILDING, FLOOR, ROOM, POSITION	MATERIAL OR PRODUCT	SURVEY REF AND SAMPLE NO.	P, SP OR S	ASBESTOS TYPE, IF KNOWN	EXTENT	CONDITION	SURFACE TREATMENT	ACCESS	SCORES: MATERIAL, PRIORITY	RECOMMENDED ACTION	LAST INSPECTED	NEXT INSPECTION	LABELLED

NOT ACCESSED

Areas not accessed

Presumed to contain asbestos and managed that way. No work there until inspected.

AREA	WHY NOT ACCESSED	SURVEY REF	INSPECTED SINCE

HSG264 PARAS 49, 56 AND 140, L143 PARA 125

NOT ASBESTOS

Materials found not to contain asbestos

Recorded so that nobody mistakes them later, and so the question is not asked again.
