

SEE IT. REPORT IT. PREVENT IT.

NEAR
MISSES
SAVE LIVES.

A NEAR MISS TODAY COULD BE A SERIOUS ACCIDENT TOMORROW.

On construction sites, near misses are a warning, not just a lucky escape. Reporting them helps keep everyone safe, especially when it comes to temporary electrics and plumbing.

REPORT NEAR MISSES.

It's everyone's
responsibility.

THE ACCIDENT PYRAMID

For every serious accident, there are many near misses that go unreported.

If we report the near misses, we can stop the serious accidents from happening.

The near misses at the bottom of the pyramid are the early warnings.

Figures are illustrative, based on the accident triangle model.
